## 7.1.2 The Institution has facilities and initiatives for

### 1. Alternate sources of energy and energy conservation measures

1. Solar energy
2. Sensor-based energy conservation
3. Use of LED bulbs/ power efficient equipment

#### Description:

The institution has facilities for alternate sources of energy and energy conservation measures. Use of LED bulbs/ power efficient equipment - The Institution is conscious about electricity conservation right from the beginning. All the buildings are constructed to provide ample natural light during the day time this saves considerable amount of electricity. Earlier tube lights were used in the class room, office and staff rooms. These have been replaced as and when the need arose by LED lights thereby reducing the consumption of electricity by almost 40 percent. These measures have been practiced since last 10 years. The electricity bills are collected annually and audited by an authentic agency to monitor the consumption of electricity and develop measures to save the consumption. From time-to-time sensor-based lights will be installed in the office shortly as a measure to be taken to save more electricity. Save electricity posters are placed in every class room and in the campus.

## SOLAR ENERGY PROJECT AT IMS

Report of Impact Analysis of Solar Energy Initiatives:

KYDSCT'S Institute of Management and science, Sakegaon has decided move away from fossil fuels and create a 100 percent renewable energy system to become self-sufficient. To power the campus with 100 percent renewable energy, IMS has objective to reduce its energy consumption, obtaining its electricity from renewable energy sources particularly Solar Energy and meeting its heating, cooling and other building energy needs with electricity. KYDSCT's IMS has enough renewable energy potential to power the institute load. It is proved that high penetrations of renewable energy are possible using technologies available today at costs that KYDSCT's IMS can afford, indicating that we can move toward an energy system powered by 100 percent renewable energy. KYDSCT's IMS campuses are great places to accelerate the transition to 100 percent renewable energy. In view of above, as a first step, KYDSCT's Institute of Management and Science, Sakegaon has installed 10.35 kW capacity solar power plant on its campus. i.e. 10.35 kW solar power plant at roof top of MBA building. The system was commissioned and put into operation since 1st March 2023.

**SPECIFICATION: 545WP SOLAR PANEL**

**MANUFACTURE BY: ADANI SOLARY SYSTEM**

**CAPACITY: 10.35KW**

## 7.1.2 The Institution has facilities and initiatives for

### 2. Management of the various types of degradable and nondegradable waste

One of the institution's principles is to keep the campus in pristine condition in order to provide a conducive environment for academic and non-academic interests. All stakeholders follow good hygienic practices as well as a comprehensive waste management plan. The core concern is to reduce, reuse and recycle wastes generated in the campus.

The Institute has different dustbins for different types of waste, such as recyclable and non-degradable. Green, blue and red bins have been provided across the campus for the collection of solid waste generated at different sources in the institute. Organic waste is disposed off in compost pits and processed and reused as manure for the plants and trees inside the campus. Plastic usage is prohibited on campus so as to create a plastic-free zone.

For liquid waste management, the water transport system is inspected for leaks in pipes, taps, valves and other components on a regular basis and promptly repaired. To ensure a clean and safe potable water supply, a reverse osmosis plant with a capacity of 5000 liters of water is in operation in the main block.

The Institute has a first aid medical kit, where students are more susceptible to minor injuries. The kit's waste such as cotton gauze and plaster are disposed along with non-degradable wastes.

All E-Wastes such as computer, its accessories and all electronic wastes are collected and discarded through the authorized vendor to ensure no hazard to the environment. In the hazardous chemicals and dyes are not used. The institute has well maintained and pollution free environment because of meticulously following the green and waste management systems.

Describe the facilities in the Institution for the management of the following  
Types of degradable and non-degradable waste

1. Solid Waste Management
2. Liquid Waste Management
3. E-Waste Management

**1 Solid waste management:**

The institute has maintained a neat and clean ambience by a well-designed and organized solid waste management system. Solid waste is segregated as degradable and non-degradable and are handed over to the concern authorities as a part of Swachh Bharat initiative & clean and green campus. Each block and each floor are provided with dry waste collecting bins every day and collected, the same is transported to the concerned places and segregate and hand over to concern. It has dust bins installed at suitable locations everywhere.

The dust bins have capacity to store for a week. Sufficient quantity of bins provided at wet waste prone areas like cafeteria, food courts and food processing along with daily collected vegetable waste, food waste is treated and converted into vermi compost and used the manure further to develop garden and plants growth in the campus. There are dustbins placed at specific points to prevent littering in the campus. The institute is striving to be a plastic free zone and making the campus eco-friendly and greenery to reduce global warming. The cartridges are refilled and re-used in the printers.

They are emptied by specifically deployed employees. The waste is emptied into tractor trolley and is carried away from the campus. It is handed over to municipal authorities for disposal. The waste from various offices, laboratories, corridors, class rooms etc is also weekly removed and dumped into trolleys.

## Solid Waste Management

MoU Signed between

KYDSCT's Institute of Management and Science, Sakegaon, Bhusawal. Dist.: Jalgaon

And

Gram panchayat, Sakegaon, Tal- Bhusawal, Dist.- Jalgaon

Date: 1 April 2018

KYDSCT's Institute of Management and Science, Sakegaon Bhusawal Dist.: Jalgaon has entered into a Memorandum of understanding (MoU) with Gram panchayat Sakegaon Tal- Bhusawal Dist.- Jalgaon for conducting collection of solid, dry waste and student recycling awareness program.

The Memorandum of understanding is valid from 1 April 2018 to 30<sup>th</sup> March 2023 for the period of five years and signing was done at KYDSCT's Institute of Management and Science, Sakegaon Bhusawal Dist.: Jalgaon on 1 April 2018 in the presence of the officials from KYDSCT's Institute of Management and Science, Sakegaon Bhusawal Dist.: Jalgaon and Gram Panchayat members for the signing of the MoU, KYDSCT's, Institute of Management and Science, Sakegaon Bhusawal Dist.: Jalgaon was represented by its Dr. Sunilraj Jayswal, Director while Gram Panchayat was represented by its Gram Sevak, and Members of panchayat. The MOU states that the two organizations will honor the agreement by promoting the awareness program for cleanliness of the campus and environment for the students of Institute of Management.

## 2 Liquid waste management:

Liquid waste is mainly the sewage coming out from hostels, messes, canteens, staff quarters and toilet blocks of the institute. The entire campus has two pipe systems in place. Here, sullage (liquid waste coming out from bathrooms and kitchen) and sewage (liquid waste coming out from latrine) are collected separately.

The sewage is passed through septic tanks and soaks pits. It is relatively small in quantity. The sullage is treated in the indigenously designed sullage plant in the campus. The treated sullage is used for gardening purpose. It has been possible to maintain a lush green campus owing to this technology. The recycled water is utilized for plantation and garden area.

Rainwater Harvesting facility consists of an elaborate network of rainwater harvesting pipes spread all over the campus. KYDSC Trust's, Institute of Management & Science has prompt water harvesting mechanism implemented at the back end of campus building. This mechanism depicted in above figures clearly and to understand it schematic drawing also exhibit in below diagram. All rain water flow top to down through collectors' pipes mounted on the back-end wall of the institute and flow at ground through channel and ultimately collected in ground reservoir. From this collected water about to 40% water absorb in soil whereas remaining approximately 60% water pumping and use for campus garden plant and trees.

We have set certain objectives behind it at IMS as :

1. Promote water efficiency practices to all the IMS stakeholders.
2. Monitor and minimize the IMS water consumption.
3. Plants indigenous flora to reduce water usage.
4. Promotes planting indigenous trees in and around the IMS and neighbouring Pharmacy campuses to reduce water usage.
5. Regularly reviews opportunities to install alternative water systems on campus wherever feasible.
6. Sustain implementation of innovative water-efficient technologies such as rainwater harvesting, reuse of water etc

Campus also maintains efforts of students, faculty and staff to implement sustainable water consumption system through the above-mentioned intervention. The students' knowledge regarding the scope and operations of rainwater harvesting and conservation techniques used in our IMS campus are enhanced through

- Awareness talks.
- Water harvesting Mechanisms & Models exhibition.
- Introducing the students to the subject of 'Aquanomics' and elaborating on its scope.
- Self-introspection sessions to analyze environmentally unethical practices.

We also celebrate world water day where we teach MBA students and faculty how to save, reuse and harvest water and preserve water as valuable asset for next generation on planet earth.

### 3 E-waste management:

The E-waste management has been given due focus and all electronic goods are put to optimum use. The old computers are used by the instructor for demonstration purposes in the practical sessions. The ones which are unusable in any manner they are exchanged with new equipment in Exchange offer. UPS Batteries are recharged / repaired /exchanged by the suppliers.

The waste compact discs are used by students for decoration and Participation in competitions 'Best out of Waste' in various activity. Computers, printers and other equipment are donated to charitable organizations after a given period of usage. The main aim is to collect E-Waste and segregate the useful circuits and components and make it into useful products. Establishing E-Waste Collection Plant in future will help by providing employment to youth in the adopted villages.

## 7.1.2 The Institution has facilities and initiatives for

### 3. Water Conservation

Rain water harvesting Bore well /Open well recharge Construction of tanks and bunds  
Waste water recycling Maintenance of water bodies and distribution system in the campus  
For the betterment of environment and to save the water; rainwater harvesting is essential. Hence Rain Water Harvesting system is established at the back side of the open auditorium. It helps to percolate the water inside the soil and increase ground water level. Bore well have been dug in the college premises. They have ample water due to rainwater harvesting plant, hence there is no scarcity of water throughout the year.

#### 1. Rain Water Harvesting

- Provision has been made for the rain water harvesting
- Water to overhead tank is installed
- To minimize the wastage of water resources and to improve the water table, the rain water is led into the pits located in different blocks of the campus/
- It avoids digging deep wells which causes environmental damage in the college campus. Having a source of water through rain harvesting also reduces the dependency on Sakegaon gram-panchayat sources.
- Implementing rainwater harvesting is beneficial because it reduces demand on existing water supply, and reduces run-off, erosion, and contamination of surface water.
- Rainwater harvesting captures, diverts, and stores rainwater for later use.

## 2. Borewell / Open well recharge

- The institute has borewells to meet the general needs of the institution
- Rainfall is the key climatic variable, which is highly erratic in nature and can have long-term inferences in respect of its quality and quantity of water.

### 3. Utilisation of Harvested Water:

- Harvested rainwater will be stored and used during times of water crisis.
- Harvested water stored in the overhead tank
- The major portion of the water collected through rain harvest is used for non-drinking purpose like gardening, flushing toilet.
- It is used for washing the floors of the institute building.

## KYDSCT's INSTITUTE OF MANAGEMENT AND SCIENCE, SAKEGAON

### Maintenance of Water bodies and Distribution system in the campus:

The water bodies are maintained regularly so as to provide sustainable, consistent, economic safe and adequate water to the campus. The main objective of the maintenance is to provide diseases free environment. In the campus, the process of Chlorination will be carried out to kill bacteria, viruses and other microbes present in water. Mainly it is carried out to prevent the spread of water borne diseases like cholera, dysentery and typhoid etc.

The distribution of water is done through well-equipped system of pipes. By the process of Ozonation and Reverse Osmosis, the water is treated as drinking water and supplied through a separate type of distribution system and other set of distribution pipes are used for all other activities.

By using Low flow plumbing fixtures, the wastage of water is highly reduced. All the collaborator of the college are educated and motivated about the importance and the usage of water in the campus. Scheduled Inspection of machineries is done in daily, weekly, monthly and annual basis in the campus. In order to avoid leakages and to prevent wastage of water, overall distribution system in the campus is well maintained and supervised by Maintenance of KYDSCT's IMS, Sakegaon.

## 7.1.2 The Institution has facilities and initiatives for

### 4. Green Campus initiatives

The institutional initiatives for greening the campus are as follows

1. Restricted entry of automobiles
2. Battery-powered vehicles
3. Pedestrian-friendly pathways
4. Ban on the use of Plastics
5. Landscaping with trees and plants

#### 1. Restricted entry of automobiles

- Entry to automobiles is restricted in Institute campus.
- Parking zones are available for students and staff

#### 2. Battery-powered vehicles

- In our campus staff and students come to the institute by using bicycles, public transport and by sharing vehicles.
- No vehicle day to create awareness on pollution free environment

#### 3. Pedestrian-friendly pathways

- Pedestrian friendly roads are laid in the paths that lead to all blocks in the campus

## MAINTENANCE OF GARDEN/GREEN AREA

### STEP 1:

Plants/Tree Care: Regular watering of plants and lawn. Pruning of trees and plants/shrubs as and when required. Regular mowing and sweeping of lawn. Removal of garden refuse from garden to the designated place. Conversion of garden garbage to compost its use as manure. Encourage plantation of seasonal flowers and trees. Report damage/compromise to landscape areas or bare areas void of vegetation that may result in sediment being transported off site; prepare a repair schedule and implement repairs fortnightly.

### STEP 2:

Lawn Care and Signage in Garden proper maintenance of garden benches, if any. Educate students to respect the utility of the lawns. Classify trees and plants by proper signage and prepare report monthly.

## PROCEDURE MAINTENANCE FOR GARDENING

Site Engineer instruct to supervisor of the Garden about gardening maintenance.

Supervisor instruct to labour (Maali) about gardening maintenance.

Green campuses I/C prepare a report based on site Engineer report and submit to the Campus Director/ Principal.

## FACILITIES FOR DIFFERENTLY ABLED STUDENTS

KYDSCT's Institute of Management and Science, Sakegaon provides special facilities for the differently abled students to provide them opportunities to adopt quality education and to bring them into the mainstream of the society.

### 1. Wheel Chair Facility:

KYDSCT's IMS has a social responsibility and perception that disabled students should be respected and treated as a normal human being. The wheel chair facility is provided for disabled students.

### 2. Ramps and Railings:

KYDSCT's IMS has a special facility of ramp and rails for the differently abled students. Near the main entrances the ramp is clearly identifiable and easily accessible. It can accommodate wheelchair users. Floor steps and ramps have hand railings for support.

### 3. Special Toilets, Rest Rooms and Class Rooms:

Modified Toilets, rest rooms and class rooms (including laboratories) are available at ground floor to facilitate the visits of differently abled students.
